DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-41 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,151,598 to Shaw et al.

As concerns claims 1, 15, 29, a server and a client (column 27, line 51); performing context-based processing of a set of information items utilizing a set of context items to produce context-processed information items, the context-based processing comprises one of context filtering and context prioritizing (abstract, line 6); implementing logic rules (column 8, lines 29-33, column 20, line 41) to perform the context filtering (column 21, line 29) and prioritizing (column 7, line 52); and use the logic rules in connection with a plurality relevance and importance matrices (column 8, lines 30-34, column 24, lines 52-54, column 21, lines 33-36) each associated with one of the plurality of information items to further perform context-based processing.

As concerns claims 2, 16 and 30, evaluate a utility function, producing an iteration evaluation based on the utility function; and based on the iteration evaluation, doing one of repeating the context-based processing and not repeating the context-based processing (abstract, lines 6-7, updating and maintaining, column 4, lines 18-19).

Art Unit: 2151

As concerns claims 3, 17 and 31, wherein the information items are heterogeneous (column 3, line 66).

As concerns claims 4, 18 and 32, receiving at least one information item in the set of information items from a user input (column 4, lines 2-4).

As concerns claims 5, 19 and 33, wherein the context-based processing further comprises context processing at a first device wherein at least one information item is received from a second device (column 3, lines 60-63).

As concerns claims 6, 20 and 34, presenting at least one context-processed information item (column 21, lines 58-67) to a user.

As concerns claims 7, 21 and 35, wherein when processing comprises context prioritizing, the method further comprises presenting in prioritized order (inherent for context that is prioritized to be in a particular order).

As concerns claims 8, 22 and 36, further comprising transferring from a first device to a second device (column 3, lines 60-63, column 21, lines 58-67, one storage unit to another or from a storage unit to a display unit).

As concerns claims 9, 23 and 37, the machine readable medium of claim 15 wherein transferring further comprises intra-device transferring (column 3, lines 60-63, column 21, lines 58-67, when computer system as a whole considered as a single device).

As concerns claims 10 and 24, when processing comprises context prioritizing, transferring further comprises transferring in prioritized order (transferred to display and displayed to user in order).

Art Unit: 2151

As concerns claims 11, 25 and 38, wherein the set of context items comprises at least one of user context (abstract, line 8), computer context, and communication network context.

As concerns claims 12, 26 and 39, wherein user context comprises at least one of user identity, activity, activity start time, activity duration, activity location, user task, user location, and a list of devices accessible by a user (abstract, lines 8-12, column 4, line 3, authorized user implies user identity).

As concerns claims 13, 27 and 40, wherein computer context comprises at least one of hardware attributes, software attributes, operating system profile attributes, power reserves, power consumption rate, amount of available memory, amount of available storage, user interfaces, costs, usage policies and security and enforcement information (dictionary inherently contains any one or all of these terms).

As concerns claims 14, 28 and 41, wherein communication network context comprises at least one of network profile attributes, network security, network stability, data transfer rate, connection quality, transfer latency, error rate, network load, signal strength, cost, quality of service, usage policies and network protocols (dictionary inherently contains any one or all of these terms).

Response to Arguments

3. Applicant's arguments filed December 2, 2005 have been fully considered but they are not persuasive.

The applicant argues Shaw does not disclose the newly added limitations of “implementing logic rules to perform the context filtering and prioritizing; and using the logic

Art Unit: 2151

rules in connection with a plurality of relevance and importance matrices each associated with one of the plurality of information items to further perform context-based processing. The examiner disagrees since Shaw does disclose logic rules (column 8, lines 29-33; column 20, line 41) for filtering (column 21, line 29) and prioritizing (column 7, line 52) and relevance and importance matrices (column 8, lines 30-34; column 24, lines 52-54; column 21, lines 33-36) to achieve context-based processing.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
